

1 1/2" Assault Zero Torque Nozzle with Molded Teeth

STYLE 4715ZT

Assault Nozzles combine quality stream performance at a variety of pressures with the simplicity of a fixed orifice. Quality stream performance at a variety of pressures, combined with a durable and simple design makes it an unbeatable value.

Features

The Zero Torque (ZT) nozzle is the first nozzle specifically designed with ergonomics, handling, control and reduced firefighter fatigue in mind. The ZT naturally keeps the nozzle out in front of the firefighter to allow for easier operation and provide better control. In addition the pistol grip and inlet swivel are positioned to eliminate the reaction force torque found in all conventional pistol grip designs. Conventional pistol grip nozzles are held at a position 3 1/2" to 4" below the center line of discharge, creating a natural torque which must be resisted by the firefighter. The ZT is positioned to eliminate the torque, leaving only the straight reaction force for the firefighter to resist.

Applications/Solutions

- Mining

Specifications

Style	4715ZT
Certification(s)	
Warranty	
Country of Manufacture	
Weight	5.7 lbs (2.6 kg)
Type	Fixed Orifice
Material	Pyrolite
Brand	Assault
Swivel Inlet	1 1/2" (38 mm)
Length	8 3/8" (213 mm)
