Adapters with limit switch as inductive proximity switch

1205 B

Switch make: Balluf BES 516-356-E4-Y
 Operating voltage: 10-30 volt three-phase a.c.
 Permissible current loading: = 130 mA d.c.

Short-circuit resistant against changeover of positive and negative, as well as against inductive voltage peaks. When protective circuit has cooled, the output signal is active again.
