- **Fast**
- **Powerful**

RS-11 MONSTER MINI SPREADER

The NEW Monster Mini Spreader is truly a monster in a lightweight package. With more than twice the power of its predecessor, the Monster Mini operates with extraordinary speed and agility, allowing quick access to patients. This spreader will handle all but the heavy-duty spread jobs, and is an excellent tool for Technical Rescue (USAR) and forcible entry. The Monster Mini's lightweight and slim profile makes it easy to use without punishing the rescuer. By producing up to 25,000 lbs of raw spreading force while weighing only 27.5 lbs, this bad boy simply makes the job easier and faster. The Monster Mini Spreader is available in 5,000 psi and 10,500 psi platforms, and is also plug and play compatible with most systems, including coaxial coupler. All of Champion's rescue tools come with a limited lifetime warranty.

The RS-11 has US and international patents
