

The 5000 psi BEAST Multi-Tool

SC-11M-5 BEAST MULTI-TOOL

Champion's BEAST Multi-Tool line eliminates the need for hot swapping tools while in use, and effectively gives the users two tools in one. In addition to the space savings, safety features and value found in our BEAST Multi-Tool, this animal generates a maximum cutting force of 294,000 lbs, which is a minimum of 35% more cutting force than any other 5,000 psi hydraulic tool on the market today. The BEAST line offers the widest cutter opening in the industry at almost 11 inches!

Our patented laminated cutting blades with internal safety restraints are designed to enable the BEAST Multi-Tool to overcome the metals found in today's toughest vehicles.

When used as a full-size spreader, the BEAST boasts a spreading width of 28", with 16" of parallel travel.

The BEAST Multi-Tool can be changed from a full-size cutter to a full-size spreader in seconds by pulling 3 pins and changing heads. Champion also offers the BEAST models in a dedicated cutter or dedicated spreader configuration, and with most industry compatible connections, including coaxial coupler.

All of Champion's rescue tools come with a limited lifetime warranty.

Champion's patented laminated cutting blades with internal safety restraints are designed into every set of blades.

The Beast has US and international patents

When Every Second Counts...

TRUST A CHAMPION

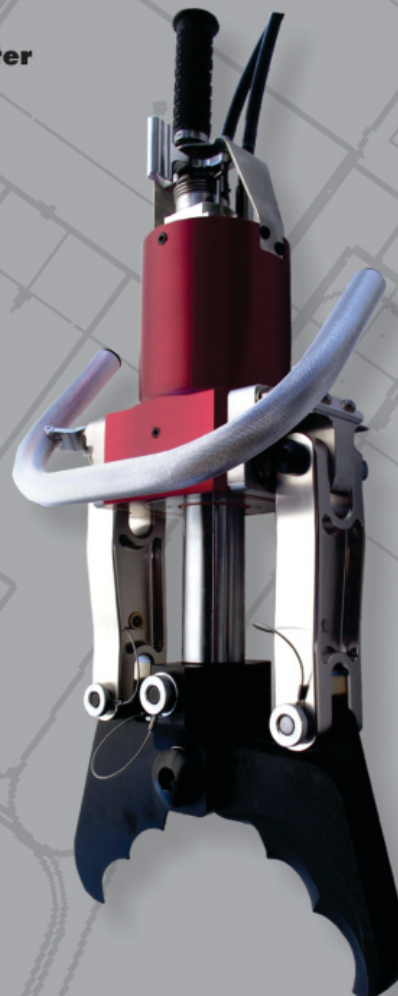

The BEAST is made of top quality aircraft metals from right here in the USA.
