

The 10,500 psi SUPER BEAST Multi-Tool

Champion's patented laminated cutting blades with internal safety restraints are designed into every set of blades.

SC-11M-10 SUPER BEAST MULTI-TOOL

Champion's SUPER BEAST is undeniably the most powerful rescue cutter in the market today. Generating an unprecedented 500,000 lbs of cutting force, this 10,500 psi SUPER BEAST is the tool to handle the ultra high strength metals found in the vehicles of today and tomorrow. With its 10.75 inch opening, patented aggressive cutting blade, and half a million pounds of cutting force, the SUPER BEAST does not know the meaning of a "work around". The SUPER BEAST uses a unique long leverage pull back operation to produce its maximum power and cutting force. This mechanical advantage makes the SUPER BEAST the most powerful tool in the industry. Our patented laminated cutting blades with internal safety restraints are designed to utilize the SUPER BEAST's extraordinary power. This design and resultant power enable the SUPER BEAST to overcome the hardest metals found not only in passenger and public transportation vehicles, but also in the heaviest-duty USAR applications as well.

The SUPER BEAST is available in 3 forms; a fixed head dedicated cutter, a fixed head dedicated spreader, and our revolutionary multi-tool with simple field changeable cutting and spreading heads. When used as a spreader, the SUPER BEAST boasts an incredible 140,000 lbs maximum spreading force, with a 28 inch opening, and 16 inches of parallel travel. Champion offers the SUPER BEAST with most industry compatible connections, including coaxial coupler. All of Champion's rescue tools come with a limited lifetime warranty.

The Super Beast has US and international patents

When Every Second Counts..... TRUST A CHAMPION

SC-11M-10 Multi-Tool Spreader and Cutter

The SUPER BEAST is made of top quality aircraft metals from right here in the USA.
Powerful • Dependable • Safe

**SC-11S-10
