

Emergency Breathing Equipment

Essex™ Industries is a leading manufacturer and provider of FAA, CAA, CAAC and ANAC approved and mandated emergency portable breathing and rescue life support systems. Our patented technology has been proven over years of use during emergencies in applications world-wide. Our protective breathing devices are used by security professionals for the government, CEO's, flight attendants and individuals.

Victim Rescue Unit Plus (VRU+)

The Victim Rescue Unit Plus (VRU+) is a light weight self-contained protective breathing device, provides up to 60 minutes of protection for respiratory, head and vision in emergency situations. Protects from fire, smoke, toxic fumes, hazardous chemical spills, and Sarin and Mustard gases. Takes just seconds to don, supplies aviator's grade oxygen to the user, and provides 360° visibility. For use by individuals in: homes; security; law enforcement; first response teams; high rise buildings; and homeland defense.

PLUS 15® Escape Respirator

The PLUS 15 Escape Respirator is a single-use, air-purifying escape respirator that will provide up to 15 minutes of protection from the effects of smoke, particulates, and toxic gases commonly found in smoke and fire situations. The Plus 15 is lightweight, portable, easy to use, and one size fits most adults.

Last Chance Rescue Filter

The Last Chance Rescue Filter is designed to protect firefighters during an out-of-air emergency, which may occur due to becoming lost/disoriented or sudden equipment failure. Triple filter technology eliminates potentially lethal gases found in fires. The Last Chance Rescue filter adapts directly to the SCBA mask, allowing the firefighter to continue egress with mask and gloves intact. Filters are available to fit all major SCBA masks.
