

Fire Blankets

All products are Kitemarked and manufactured to BS EN 1869:1997

Manufactured in UK under BS EN 9001:2000 Quality Management System

A range of glass fibre fire blankets for domestic and light industrial use

Supplied in red hard plastic container for easy surface mounting

Fire blanket can also be used on fires involving personal clothing

1 metre x 1 metre fire blankets are for use in small kitchens, for homes and caravans

1.2 metre x 1.2 metre fire blankets are effective for most small commercial and domestic kitchens.

1.8 metre x 1.2 metre fire blankets are suitable for commercial kitchen use and also effective when used for personnel safety and workshop use. This fire blanket can also be used to wrap around a person whose clothes are on fire.

Fire blankets are made of fire resistant materials and efficiently packaged in a choice of containers. They are particularly useful for smothering fires or for wrapping round a person whose clothing is on fire. They are also simple to use and extremely effective in smothering chip pan fires. They are suitable in many commercial situations, to combat fires in laboratories, to protect people, or even just to put out an accidental fire in a waste paper bin.

The Fire Blanket is placed over a fire in order to smother it and work by excluding air from the fire, and extinguishing it.

Model	FBB110-HP	FBB120-HP	FBB160-HP
Blanket Size	100x100cm	120x120cm	180x120cm
