Comments: Matjack's unique construction of six layers of woven aramid fiber provide a lifting bag unequalled in strength and durability. All Matjack airbags are marked with a distinct "bull's-eye" center for ease of placement. All Matjack airbags come with a conical interlocking surface to limit slippage and aid in stacking. Larger size Matjacks come with side handles for easy transport and placement. Whether purchasing an entire system or adding to an existing system, see what the Matjack Advantage is all about.
