

Trolley „Care“

...worldwide for fire and rescue!

The Gimaex-Schmitz Fire and Rescue GmbH received for the factory in Wilnsdorf in 1997 the order, to work out a construction scheme in close cooperation with the responsible ladies and gentlemen from the Regional Commission in Düsseldorf. On the basis of that construction, a prototype had been designed and presented to a brains trust of the aid organisations in the beginning of 1998 in Düsseldorf.

In July 1999, Gimaex-Schmitz Fire and Rescue GmbH received the order to produce more than 40 of such trolleys for care services. Those 40 trolleys had been delivered to the aid organisations in November 1999.

The equipment, also delivered by Gimaex-Schmitz, for such care trolleys consist also of:

- a tent with tables and benches
- devices for guaranteeing the supply of a large number of persons with warm beverages and food at catastrophes.

That are:

- drinking cups,
- plates, cutlery
- transport containers for food
- thermos flasks for hot beverages
- pots and gas cooker
- blankets and rain protection clothes, stretchers
- baby care- and sanitary products
- lighting devices and office materials
