Firefighting Reels

The
Hannay
Way

Preconnect or Storage • No Draining, Stacking or Dragging
All Sizes and Capacities • Efficient Use of Vehicle Space
Increased Hose Capacity • Faster Clean-up

www.hannay.com

Pride in workmanship • Reels built to order • Consistent quality • Service with integrity • Value for your dollar

INTRODUCTION

It's easier to handle hose – from booster to large diameter hose – when Hannay Reels are lending a hand.

Pumper with six reel units—1" booster hose to 4"LD collapsible hose.

FIREFIGHTERS AROUND THE WORLD DEPEND ON HANNAY REELS.

For decades, Hannay Reels has set the standard of quality and reliability for hose reels in the firefighting industry.

In supplying both apparatus manufacturers and after-market fire departments worldwide, Hannay has consistently serviced the needs of the industry. With Hannay Reels, there's no draining, stacking, or dragging. Plus, firefighters appreciate quick attack and fast pick-up.

Through research and development of internationally recognized standard models, to custom one-of-a-kind applications, Hannay continues to meet the specific needs of the vehicle or fire department.

Our firefighting reels come in all sizes and capacities and make efficient use of vehicle space. Numerous options and configurations are readily available to meet your needs.

Attention Truck Committees and Specifiers of Fire Apparatus

Products shown and described in this catalog are suggested models for broad use applications throughout the firefighting industry.

All our components are designed for multiple configurations to fit all your applications and space requirements.

Therefore, all reel models can be adjusted dimensionally to fit your specific needs.

For special requirements, contact your Hannay dealer or call our inside sales group.

To order any Hannay Reel in this brochure, use the specifications listed here in conjunction with our Ordering & Accessory Guide.

SPECIFYING HANNAY REELS

LOCATION OF COMPONENTS

Optional Location of Components:

Location of the inlet, outlet riser and rewind mechanism can be varied to meet your requirements and must be specified on your order. The drawings below show the component locations. Unless otherwise specified, most reels will be shipped as Right Top Rewind with the inlet, outlet riser and rewind mechanism on the operator's right.

Right Top Rewind (RT)
reels have the inlet, outlet riser and rewind mechanism on the operator's right. Hose unwinds from the top of the reel.

Left Top Rewind (LT)
reels have the inlet, outlet riser and rewind mechanism on the operator's left. Hose unwinds from the top of the reel.

Right Bottom Rewind (RB)
reels have the inlet, outlet riser and rewind mechanism on the operator's right. Hose unwinds from the bottom of the reel.

Left Bottom Rewind (LB)
reels have the inlet, outlet riser and rewind mechanism on the operator's left. Hose unwinds from the bottom of the reel.

Note: Use position initials as suffix after model number, ie: EF32-23-24-RT

Optional Motor Locations

**Bottom Rear
(Standard)**

Bottom Front

Elevated 2 o'clock

Elevated 10 o'clock

Electric rewind motors can be installed in any of the positions shown in these drawings. The Bottom Rear position is standard. The motor is installed inside the frame on Model ESF reels, which are designed for installation in restricted space.

Optional Auxiliary Rewind Positions

Horizontal ring and pinion gear crank rewind mechanism is the standard configuration. Optional positions include vertical and 30° above centerline, as shown in these drawings. Both are available at extra cost and must be specified.

**Horizontal
(Standard)**

Vertical

30° Angle

Optional Roller Positions

Optional roller assembly mounting kits, up to 2 of either can be mounted per reel. Consult factory, and indicate installation location – front or rear of reel.

F4000

COMPACT REELS FOR BOOSTER HOSE

To handle single 3/4" I.D. or 1" I.D. hose.

- Choose direct crank rewind (removable) or chain and sprocket drive powered by electric, hydraulic or compressed air motor.
- Power rewind supplied with comet brake.
- Direct crank rewind supplied with cam-lock brake.
- Standard inlet 90° ball bearing swivel joint with 1" female NPT threads.
- Standard outlet 1" male NST threads (1.375" x 8 threads per inch).
- Consult factory for other sizes and/or threads.
- Standard inlet, outlet riser and hub assembly are steel (also available in stainless steel).
- Rollers and roller mounting brackets are accessory items. Specify roller position.

Standard Electric Motor Configuration Shown

- Pressures to 1000 psi (69 bar).
- Temperatures from -60°F to +250°F (-51°C to +121°C).
- Consult factory for other pressures and temperatures.

CAUTION: F4000/4100 series reels not recommended for use with Niedner Reeltext hose. See page 18.

Parts Drawing – ISO 68

Model Number	Hose Capacity of Reel			Approx. Weight		Reel Dimensions***						
	feet m.			lb. kg.		inches mm.						
	I.D. (in) I.D. (mm)	3/4" 19	1" 25	NET	SHIP	A	B	E CRANK	E POWER	F CRANK	F POWER	X
For Power Rewind See Note 4	O.D. (in) O.D. (mm)	1-9/32" 33	1-9/16" 40									
F4024-17-18		100 30	50 15	46 21	56* 25	21 533	16 406	16.5 419	19 483	32.62 829	27 686	19.5 495
F4038-17-18		200 61	100 30	70 32	125 57	35 889	30 762	16.5 419	19 483	46.62 1184	41 1041	33.5 851

Notes:

Specifications subject to change.

1. Upon request, reels can be supplied with drum lengths other than shown and with disc sizes in other diameters.
2. Weights shown in chart are for crank rewind models. Add these amounts for power rewind models.

	Net (lbs.)	Ship (lbs.)	Net (kg.)	Ship (kg.)
Electric	18	18	8.2	8.2
Hydraulic	15	15	6.8	6.8
Air	15	15	6.8	6.8

3. Dimension "F" is the overall length of standard model reels. On crank rewind models, the dimension shown is with the crank in rewind position. Reels require 3-1/2" clearance to remove crank handle.

4. When ordering power rewind models, prefix number with:
A = Air Rewind E = Electric Rewind HD = Hydraulic Rewind
(Air rewind reels are supplied with control valve and hose, 12v and 24v DC rewind reels are supplied with switch and solenoid, 115v AC rewind reels are not supplied with switch but can be ordered separately, hydraulic rewind reels are not supplied with control valve.)

5. Be sure to check dimensions and weights prior to ordering.

6. Some roller options may prohibit the use of our molded chain guard.

NOTICE: A Flexible Connector must be used between the inlet pipe and the inlet swivel joint.

*When shipped as a parcel package (via FedEx or UPS Ground).

**x,y indicate mounting holes.

Optional External Mounting Brackets part no. 9906.0025 Add 2-1/2" to X dimension shown in the chart.

F4100

MANUAL OR POWER REWIND REELS

To handle single 3/4" or 1" I.D. hose.

Electric Rewind Shown with Gear Driven Crank Rewind

- Lightweight compact reels designed for long lengths of hose in manual and power rewind.
- Gear driven crank rewind handle is removable.
- Chain and sprocket drive powered by electric, hydraulic, or compressed air motor.
- Gear driven crank rewind, adjustable pinion brake.
- Standard inlet 90° ball bearing swivel joint 1" female NPT threads.
- Standard outlet 1" male NST threads.
- Optional Rollers: Specify roller position when ordering.
- Pressures to 1000 psi (69 bar).
- Temperatures from -60° F to +250° F (-51° C to +121° C).
- Consult factory for other pressures & temps.

CAUTION: F4000/4100 series reels not recommended for use with Niedner Reeltex hose. See page 18.

4. Dimension "F" is the overall length of standard model reels.
5. When ordering power rewind models, prefix model number with:
A = Air Rewind E = Electric Rewind HD = Hydraulic Rewind
(Air rewind reels are supplied with control valve and hose; 12v and 24v DC rewind reels are supplied with switch and solenoid; 115v AC rewind reels are not supplied with switch but can be ordered separately; hydraulic rewind reels are not supplied with control valve.)

6. Be sure to check dimensions and weights prior to ordering.

NOTICE: A Flexible Connector must be used between the inlet pipe and the inlet swivel joint.

*** x,y indicate mounting holes.

F

FOR BOOSTER HOSE**To handle 3/4" I.D. or 1" I.D. hose.**

- Painted steel booster hose reel is dependable, rugged.
- "Super Booster" (aluminum construction) reel weighs up to 30% less than standard booster reel. Stainless Steel construction is also available.
- Gear-driven crank rewind is standard. Choose chain and sprocket drive powered by electric, hydraulic or compressed air motor.
- Pinion brake standard.
- Standard inlet 1" 90° ball bearing swivel joint with 1" female NPT threads.
- Standard outlet 1" male NST threads. (1.375" x 8 threads per inch.)
- Consult factory for other sizes and/or threads.
- Standard inlet, outlet riser and hub assembly are steel (also available in stainless steel).
- Rollers and roller mounting brackets are accessory items. Specify roller position
- Pressures to 1000 psi (69 bar).
- Temperatures from -60°F to +250°F (-51°C to +121°C).
- Consult factory for reels to operate at other pressures and temperatures.

CAUTION: When using Niedner Reeltex hose a special riser and/or larger drum diameter is required.

See chart for capacity on page 18, or consult factory.

Notes:

Specifications subject to change.

1. A two-way flow hub is available at no extra cost and must be specified. Assembly is threaded on both ends so swivel joint can be attached at either end of the reel. A pipe cap seals the opposite end. (See Ordering & Accessory Guide.)
2. Upon request, reels can be supplied with drum lengths other than shown and with disc sizes in other diameters.
3. Weights shown in chart are for manual rewind models. Add these amounts for power rewind models.

	Net (lbs.)	Ship (lbs.)	Net (kg.)	Ship (kg.)
Electric	40	40	18.1	18.1
Hydraulic	20	20	9.1	9.1
Air	20	20	9.1	9.1

4. When ordering power rewind models, prefix model number with:
 E = Electric rewind (1/3 HP) EP = Electric rewind (1/2 HP)
 A = Air rewind HD = Hydraulic Rewind
 (Air rewind reels are supplied with control valve and hose; 12v and 24v DC rewind reels are supplied with switch and solenoid, 115v AC rewind reels are not supplied with switch but can be ordered separately, hydraulic rewind reels are not supplied with control valve.)
5. For polished aluminum reels, prefix complete model number with "SB"; for example: SBEF 32-19-21.
- * The "F" dimension for these models is shown for 1/3 HP motors. Add 2" to "F" dimension for 1/2 HP motors. The "F" dimension for all other reels is shown for 1/2 HP. Reels handling 200' or more must use 1/2 HP Motor.
 (Use prefix EP when ordering.)
6. When installing FH-3 rollers add 4-1/2" to "D" dimension.

7. Be sure to check dimensions and weights prior to ordering.

NOTICE: A Flexible Connector must be used between the inlet pipe and the inlet swivel joint.

***x,y indicate mounting holes.

SF

FOR BOOSTER HOSE— INBOARD MOUNTED MOTOR

To handle 3/4" I.D. or 1" I.D. hose.

- Inboard motor location high profile
- All models are available in aluminum or stainless steel construction.
- Gear-driven crank rewind is standard. Choose chain and sprocket drive powered by electric, hydraulic or compressed air motor.
- Pinion brake standard.
- Standard inlet 1" 90° ball bearing swivel joint with 1" female NPT threads.
- Standard outlet 1" male NST threads (1.375" x 8 threads per inch).
- Consult factory for other sizes and/or threads
- Standard inlet, outlet riser and hub assembly are steel (also available in stainless steel).
- Rollers and roller mounting brackets are accessory items. Specify roller position.
- Pressures to 1000 psi (69 bar)
- Temperatures from -60°F to +250°F (-51°C to +121°C).
- Consult factory for other pressures and temperatures.

CAUTION: When using Niedner Reeltex hose a special riser and/or larger drum diameter is required .

See chart for capacity on page 18, or consult factory.

Notes:

Specifications subject to change.

- A two-way flow hub is available at no extra cost and must be specified. Assembly is threaded on both ends so swivel joint can be attached at either end of the reel. A pipe cap seals the opposite end (See Ordering & Accessory Guide.)
- Upon request, reels can be supplied with drum lengths other than shown and with disc sizes in other diameters.
- Weights in chart are for manual rewind models. Add these amounts for power rewind models.

	Net (lbs.)	Ship (lbs.)	Net (kg.)	Ship (kg.)
Electric	40	40	18.1	18.1
Hydraulic	20	20	9.1	9.1
Air	20	20	9.1	9.1
- When ordering power rewind models, prefix model number with:
 E = Electric Rewind (1/3 HP) EP = Electric Rewind (1/2 HP)
 A = Air Rewind HD = Hydraulic Rewind
 (12v and 24v DC rewind reels are supplied with switch and solenoid; 115v AC rewind reels (prefix EP) are not supplied with switch but can be ordered separately.)

5. For polished aluminum reels, prefix complete model number with "SB"; for example: SBESF32-19-21.

6. All frames are rollformed channel, except Super Booster, which is square tubing.

7. Be sure to check dimensions and weights prior to ordering.

NOTICE: A Flexible Connector must be used between the inlet pipe and the inlet swivel joint.

* Reels handling 200' or more of 1" must use 1/2 HP Motor.

***x,y indicate mounting holes.

TWIN KIT

FOR BOOSTER HOSE REELS

Series F & FF.

Twin booster hose reels combine matched F or FF Series reels in a single unit with a center-mounted roller and spool assembly. Hose from both reels can be used on either side of the truck. Rugged unit frame construction maintains alignment and simplifies installation when two reels are combined. All models are also available as Super Booster reel with aluminum and plated components as described on pages 4-5 or pages 14-15.

Two F Series Reels, and a Twin Fire Reel Conversion Kit

Two F Series Reels, and a Twin Fire Reel Conversion Kit and Two optional outrigger roller assemblies

FH-3 Roller and Spool Assembly

Not recommended for hoses larger than 1-1/2" I.D.

Speeds handling and reduces hose wear. Buffed stainless steel rollers resist corrosion, pitting and abrasion. Polished, chrome-plated spools and blocks add lasting beauty to your equipment. Delrin bearing surfaces provide for quiet operation and minimum wear.

Assembly can be factory-installed, when specified, or ordered for field installation on reels or other equipment.

To order: For factory installation, specify FH-3 Assembly and indicate position on reel. As a component, the complete model number of the reel must be specified.

P/N 9939.0042

FH-3 Top Wind Outrigger Mounting Brackets
P/N 9941.0023

TWIN REEL CONVERSION KIT

Part No.	Description (model of reel must be specified)
Steel Reels	
9920.0050	Conversion Kit for Twin Fire Reel w/FH3 Roller Assembly for small steel pressed frame (23-24 and smaller)
9920.0051	Conversion Kit for Twin Fire Reel w/FH3 Roller Assembly for large steel pressed frame (25-26 and larger)
9920.0052	Conversion Kit for Twin Fire Reel w/FH3 Roller Assembly for 33-34 steel roll-formed frame
Super Booster Reels	
9920.0055	Conversion Kit for Twin Fire Reel w/FH3 Roller Assembly for small aluminum pressed frame (23-24 and smaller)
9920.0056	Conversion Kit for Twin Fire Reel w/FH3 Roller Assembly for large aluminum pressed frame (25-26 and larger)
9920.0057	Conversion Kit for Twin Fire Reel w/FH3 Roller Assembly for 33-34 aluminum square tubing frame

FH-3 Roller Assembly

Note:
Requires strap style bearing

Frame Components

Dimensions of Twin Kit for "F" Series Reels:

(in conjunction with chart on page 5, after assembly)

for models ending with	Dimension	
	E	J
23-24	48.5"	28.0"
25-26	52.5"	31.38"
30-31	60.5"	31.38"
33-34	66.5"	33.75"

Options: (model must be specified)

For additional outrigger option (see lower photo top of page 8): you will need 2 - 9939.0042 FH-3 Roller & Spool assemblies, and 2 - 9941.0023 FH-3 Top Wind Outrigger Mounting Brackets.

Assembly can be factory-installed, when specified, or ordered for field installation on reels or other equipment.

7100/7200

FOR DUAL-AGENT APPLICATIONS

To handle dual hose 3/4" I.D. thru 1-1/2" I.D.

- Two swivel joint inlets and two outlet risers.
- All models are available with optional aluminum or stainless steel construction.
- Gear-driven crank rewind is standard. Choose chain and sprocket drive powered by electric, hydraulic or compressed air motor.
- Pinion brake standard.
- Standard inlet, outlet riser and hub assembly are steel (also available in stainless steel).
- Rollers and roller mounting brackets are accessory items. Specify roller position.

Series 7100

- Standard inlets are 1" 90° ball bearing swivel joints with 1" female NPT threads.
- Standard outlets are 1" male NST threads (1.375" x 8 threads per inch).
- Pressures to 1000 psi (69 bar)
- Temperatures from -60°F to +250°F (-51°C to +121°C).

Series 7200

- Standard inlets are 1-1/2" 90° ball bearing swivel joints with 1-1/2" female NPT threads and 2" victaulic groove.
- Standard outlets are 1-1/2" male NST threads (1.990" x 9 threads per inch).
- Pressures to 600 psi (41 bar)
- Temperatures from -20°F to +225°F (-29°C to +107°C)

Both Series

- Consult factory for other sizes and/or threads.
- Consult factory for other pressures and temperatures.

CAUTION: When using Niedner Reeltex hose a special riser and/or larger drum diameter is required (consult factory).

Notes:

Specifications subject to change.

1. Upon request, reels can be supplied with drum lengths other than shown and with disc sizes in other diameters.
2. Weights in chart are for manual rewind models. Add these amounts for power rewind models:

	Net (lbs.)	Ship (lbs.)	Net (kg.)	Ship (kg.)
Electric	40	40	18.1	18.1
Hydraulic	20	20	9.1	9.1
Air	20	20	9.1	9.1

3. When ordering power rewind models prefix model number with:
EP = Electric Rewind (1/2 HP) A = Air Rewind HD = Hydraulic Rewind
(Air rewind reels are supplied with control valve and hose, 12v and 24v DC rewind reels are supplied with switch and solenoid, 115v AC rewind reels are not supplied with switch but can be ordered separately, hydraulic rewind reels are not supplied with control valve.)
4. For polished aluminum reels, prefix complete model number with "SB"; for example: SBEP 7128-23-24.

5. Be sure to check dimensions and weights prior to ordering.

NOTICE: A Flexible Connector must be used between the inlet pipe and the inlet swivel joint.

***x,y indicate mounting holes.

3100/3600

FOR INDUSTRIAL FIRE PROTECTION

To handle 3/4" I.D. thru 1-1/2" I.D. hose.

- The reel can be installed on the floor or wall.
- Steel construction is standard. Aluminum or stainless steel construction is available.
- Choose disc rewind or removable direct crank rewind.
- Supplied with spring actuated pinlock.
- Standard inlet, outlet riser and hub assembly are steel (also available in stainless steel).
- Rollers and roller mounting brackets are accessory items. Specify roller position.

Series 3100

- Standard inlet 1" 90° ball bearing swivel joint with 1" female NPT threads.
- Standard outlet 1" male NST threads (1.375" x 8 threads per inch).
- Pressures to 1000 psi (69 bar).
- Temperatures from -60°F to +225°F (-51°C to +121°C).

Series 3600

- Standard inlet 1-1/2" 90° ball bearing swivel joint with 1-1/2" female NPT threads and 2" victaulic groove.
- Standard outlet 1-1/2" male NST threads (1.990" x 9 threads per inch).
- Pressures to 600 psi (41 bar).
- Temperatures from -20°F to +225°F (-29°C to +107°C).

Both Series

- Consult factory for other sizes and/or threads.
- Consult factory for other pressures and temperatures.
- Removable Crank Rewind is standard.
- For Hand over Hand Rewind option (less crank) consult factory.

CAUTION: When using Niedner Reeltex hose a special riser and/or larger drum diameter is required (consult factory).

Notes:

- Specifications subject to change.
- 1. Upon request, reels can be supplied with drum lengths other than shown and with disc sizes in other diameters.
- 2. Power rewind are not available on these models. See Series F or FF.
- 3. 4" clearance needed for crank handle removal.
- 4. **Be sure to check dimensions and weights prior to ordering.**

NOTICE: A Flexible Connector must be used between the inlet pipe and the inlet swivel joint.

***x,y indicate mounting holes.

FF

FOR LARGE BOOSTER HOSE OR PRECONNECTED COLLAPSIBLE HOSE

To handle 1-1/4" I.D. or 1-1/2" I.D. booster hose or 1-1/2" I.D. or 1-3/4" I.D. collapsible hose.

- Accommodate large diameter booster hose or preconnected collapsible hose.
- Flanged outlet riser .
- All models are available in aluminum or stainless steel construction.
- Gear-driven crank rewind is standard. Choose chain and sprocket drive powered by electric, hydraulic or compressed air motor.
- Pinion brake standard.
- Standard inlet 1-1/2" 90° ball bearing swivel joint with 1-1/2" female NPT threads and 2" victaulic groove.
- Standard outlet 1-1/2" male NST threads. (1.990" x 9 threads per inch.)
- Consult factory for other sizes and/or threads.
- Standard inlet, outlet riser and hub assembly are steel (also available in stainless steel).
- Rollers and roller mounting brackets are accessory items. Specify roller position.
- Pressures to 600 psi (41 bar)
- Temperatures from -20°F to +225°F (-29°C to +107°C).
- Consult factory for other pressures and temperatures.

CAUTION: When using Niedner Reeltex hose a special riser and/or larger drum diameter is required .

See chart for capacity on page 18, or consult factory.

Notes:

Specifications subject to change.

- Dimensions up to and including 30-31 disc size reflect pressed frames. All others are rollformed channel frames, except Super Booster, which is square tubing.
- Upon request, reels can be supplied with drum lengths other than shown and with disc sizes in other diameters.
- Weights in chart are for manual rewind models. Add these amounts for power rewind models.

	Net (lbs.)	Ship (lbs.)	Net (kg.)	Ship (kg.)
Electric	40	40	18.1	18.1
Air	20	20	9.1	9.1
Hydraulic	20	20	9.1	9.1

- When ordering power rewind models, prefix model number with:
EP = Electric Rewind (1/2 HP) A = Air Rewind HD = Hydraulic Rewind
(Air rewind reels are supplied with control valve and hose; 12v and 24v DC rewind reels are supplied with switch and solenoid. 115 v AC rewind reels are not supplied with switch but can be ordered separately, hydraulic rewind reels are not supplied with control valve.)

- For polished aluminum reels, prefix complete model number with "SB"; for example: SBEPFF28-23-24.

6. Be sure to check dimensions and weights prior to ordering.

NOTICE: A Flexible Connector must be used between the inlet pipe and the inlet swivel joint.

***x,y indicate mounting holes.

LD

REELS AND SPOOLS TO HANDLE UP TO 6" I.D. COLLAPSIBLE HOSE

Typical Installations:

Single large-capacity reel installed in the hose bed area to handle long lengths of pre-coupled hose. Hose pays out from the top of the reel so gravity assists unwinding.

Two reels installed in the hose bed. In this arrangement, the upper reel is unloaded only if necessary. Payout and rewinding of the upper reels are facilitated by the position of the lower reel. Two reels with larger-diameter discs and narrower drums can also be installed side-by-side in the rear of the hose bed to handle approximately the same amount of hose. This method allows a center walkway or paying out two lines simultaneously if required.

- Square tubing frames.
- Heavy gauge steel discs.
- Drums are formed by reinforced tie rods with radial supports.
- Pillow block ball bearings.
- Chain & sprocket rewind with electric (12 or 24V) or hydraulic rewind motor.
- Hydraulic caliper disc brake.

Hydraulic Requirements

- It is important that the End user provide the O.E.M. with complete specifications as to the required operation of the large diameter reel being specified. Any speed and torque requirements **MUST** be known to properly specify the correct reel for the application.
- Hannay Reels does not recommend specific brands for hydraulic system components. We suggest you work with your hydraulic component supplier to meet your specs.

Custom Reels

- The standard models listed represent the most frequently specified customer requirements for handling large-diameter fire hose. Because of the many possible variations in reel installation and hose capacity requirements, we will also custom build reels and spools to your specifications to become an integral part of the apparatus. Reels are built of steel construction, and various finishes are available.

Consult factory for complete specifications on a LD reel to meet your requirements.

Important: Hose capacity is based on the flat hose dimensions listed below, with couplings at 100 foot intervals.

Flat Hose Dimensions

I.D.	THICK x WIDTH	THICK x WIDTH METRIC EQUIVALENT
1"	1/2" x 1-3/4"	12.7 x 44.4
1-1/2"	3/4" x 3"	19.0 x 76.2
1-3/4"	7/8" x 3-1/4"	22.2 x 79.4
2"	3/4" x 3-1/2"	19.0 x 88.9
2-1/2"	3/4" x 4"	19.0 x 101.6
3"	1/2" x 5"	12.7 x 127.0
4"	1/2" x 6-1/2"	12.7 x 165.1
5"	1/2" x 8"	12.7 x 203.2
6"	1/2" x 10"	12.7 x 254.0

Custom sizes available to meet specific needs.

Electric rewind not available on these models.

Notes:

Specifications subject to change.

1. Upon request, reels can be supplied with drum lengths other than shown and with disc sizes in other diameters.

2. Be sure to check dimensions and weights prior to ordering.

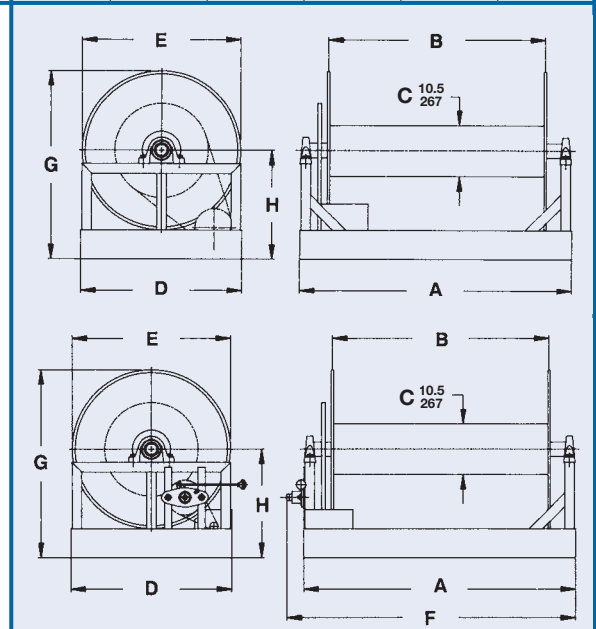

Version F Reel:

Complete reel assembly with No. 50 chain and sprocket and hydraulic rewind motor mounted inside the frame. When ordering use prefix model number with HD; for example, HDLD 350-64 version F.

Version G Reel:

(High profile) complete reel assembly with chain and sprocket drive and electric rewind motor, including clutch and double reduction unit. Motor is mounted inside the frame. Disc diameters (E dimension) up to and including 39" only. When ordering use prefix model number with EP; for example, EPLD 242-39 version G.

"F" dimension = "A" dimension +4

- Notes:**
 Specifications subject to change.
 1. These reels require a special angle riser and larger diameter drum, consult factory.
 2. For F series - refer to notes & diagram on page 5.
 3. For FF series - refer to notes & diagram on page 15.

HOW TO ORDER REELS

Hannay Reels Order Worksheet

To order Hannay Reels, fill out this simple form (or a photocopy) and mail or fax to your Hannay Reels dealer.

1. Who's the reel for?

Company _____	Street Address _____		
Division _____	City _____	State _____	Zip _____
Contact _____	Telephone _____		Country _____
		Fax _____	Date _____

2. What is the reel for?

HOSE (check one):

Live Storage only Single hose Dual hose

Inside diameter: _____

Outside diameter: _____

Bend radius: _____

Hose length: _____

Hose weight: _____

Flat hose dimensions: _____

Coupling spacing: _____

Type of product handled live application (check one):

Liquid (specify type): _____

Gases (specify type): _____

Oxygen/Acetylene: _____

Other (specify type): _____

Hydraulic fluid (specify type): _____

Temperature: _____

Pressure: _____

CABLE (check one):

Live Storage only

No. of conductors required: _____

Outside diameter: _____

Bend radius: _____

Reel inlet type (check one):

90° Straight

Special material (internal hub assembly)

Aluminum Malleable iron Stainless steel Steel

Connector size: _____

Reel outlet type (riser):

Size: _____

Thread (check one):

National Pipe Thread (NPT)

Joint Industry Committee (JIC)

National Standard Thread (NST)

British Standard Pipe (BSP)

Other _____

Indicate your special specifications _____

Cable length: _____

Number of Connectors: _____

Cable weight: _____

Amperage (live application only): _____

Voltage: _____

3. What features does the reel need?

Check type of rewind:

MANUAL

Disc rewind (hand over hand) Gear-drive crank

Direct crank (permanent or removable) Chain-drive crank

POWER

Spring Electric (voltage: _____)

Air Hydraulic

Check type of installation:

Floor Wall Overhead Vehicle

Temperature Range: _____

Environment: _____

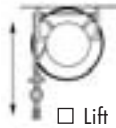

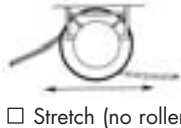

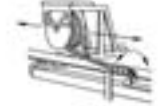

Accessories (if any): _____

Finish (if other than standard): _____

Roller Assemblies: _____

Hose/Cable Stop: Yes No Specify Hose/Cable O.D. _____

Check type of installation and roller position (for spring reels only):

	
<input type="checkbox"/> Lift	<input type="checkbox"/> Stretch (no roller)
	
<input type="checkbox"/> Drag	<input type="checkbox"/> Recovery/Pick-up No roller
<input type="checkbox"/> Roller	
<input type="checkbox"/> Position VR	<input type="checkbox"/> Position SR
<input type="checkbox"/> Position TR	<input type="checkbox"/> Constant tension

4. Please note size and/or weight limitations for your installation

Length _____ Width _____

Height _____ Weight _____

It's easier to handle hose—from booster to large diameter hose—when Hannay Reels are lending a hand.

"Narrow roads in an old fishing village such as ours require long lengths of large diameter hose for proper water volume. Hannay Series LD fit the bill perfectly, fast payout and pickup answered our needs."

*Jim Burrows, Fire Coordinator
Kennebunkport (ME) Fire Department*

1st Lt. George Conklin of Unexcelled Fire Company states, "Hannay makes the hardest job easier. When the men are exhausted and fatigued from fighting a fire, they can pack up the hose in one-third the time."

FIREFIGHTING AND RESCUE OPERATIONS ALL AROUND THE COUNTRY DEPEND ON HANNAY REELS.

For years, Hannay has produced the best firefighting and rescue hose and cable reels found anywhere in the world. Firefighters and rescue squads have come to depend on Hannay Reels for their dependability, ease of use, and long life. But don't take our word for it. Here's what some of our customers have to say about Hannay Reels.

"Hannay Reels gives us easy hose dispersal and quick pick-up."

*– Malcolm Farrell,
Wilson Fire Department, Windsor, CT.*

"The speed of our first attack is crucial, and Hannay Reels give us "instant on" with even partial payout. So we're right where the emergency is."

*– Peter Goldstein, Coram,
Long Island (NY) Fire Department*

"In rescue operations, you have to be fast to be effective. Hannay Reels save us time in payout and clean-up."

*– John Dugan,
Wellsboro (PA) Fire Department*

For more information on all our hose and cable reels for firefighting and rescue operations, please request our Rescue Reels Catalog.

Hannay Reels Help Protect, Maximize Success

Hose and cable reels are major tools that make firefighting operations safer and more efficient. Firefighters cannot waste any time fighting with hose or power cables because payout time is of the highest priority. According to fire experts, a properly positioned first attack hose line saves the most lives at a fire, confines it, and reduces property damage.

The significant length and weight of fire hose additionally makes reels a necessity, as maneuvering the hose would otherwise be unmanageable. Accommodating fire hose reels on the trucks is a challenge since space must be maximized while also ensuring all necessary rescue equipment fits on board. Hannay reels are custom built to your specific size requirements to facilitate ease of installation and service in any location on your apparatus. Through research and development of internationally recognized standard models, to custom one-of-a-kind applications, Hannay is known for consistent service in supplying both apparatus manufacturers and aftermarket fire departments worldwide.

Rescue Reels catalog also available.

Family owned and operated since 1933, Hannay Reels is a leader in both OEM and aftermarket applications. Hannay offers thousands of standard hose reel and cable reel models, as well as unmatched custom capabilities. We can easily and affordably customize a reel to meet your exact specifications – built to last, delivered fast. Additional catalogs are available through your local Hannay Reels dealer or online at www.hannay.com.
