# Proximity Helmets

Engineered for extreme radiant heat and fire conditions

Paul Conway proximity helmets provide optimum protection to fire fighters exposed to extreme radiant and fire conditions while delivering unparalleled comfort.

## American Classic™ and Legacy 5™

Paul Conway NFPA 1971 compliant proximity helmets are available in both the American Classic™ and Legacy 5™ (see pages 6-9 for helmet details). Each has an aluminized cover and shroud.

### Helmet Cover

- Aluminized fabric
- Side openings with hook and loop tabs to allow easy donning over the faceshield brackets
- Heavy-duty elastic provides secure fit over helmet shell
- Eyelets for mounting leather fronts on traditional-style helmets
- Dee ring slot

### Helmet Shroud

- Aluminized fabric
- Moisture barrier for comfort and additional protection of neck and ears
- Side notches allow helmet chinstraps to slide inside shroud and under helmet

### 6" Gold Faceshield

- Durable gold coating won't peel off
- Black plastic side supports for extra side durability

### J-Fire Configuration Available

J-Fire versions of the Paul Conway proximity helmet are also available. The J-Fire version has the same features as the standard proximity helmets, but also comes with the special CZ1A canister cover. It secures the canister beneath the shroud with a convenient hook and loop attachment system.
