

# Double Hose Reels

## DHR

The practical Double Hose Reel for rapid deployment. Two tools can be stored on the vehicle - already connected to the pump - ready for action. When needed, pick-up the tools and unroll the hoses.

### Highlights

- Space saving storage of hose sets on the vehicle
- Hose sets can be unrolled - even under pressure
- Color-coded hose sets prevent confusion
- Mechanical brake for both hose sets
- Luminescent hoses

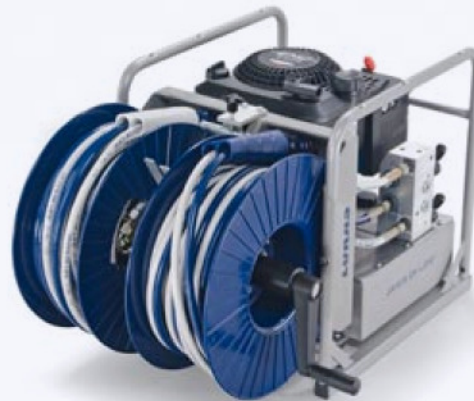

The DHR is designed to be mounted on LUKAS pumps with R-frame (DIN-version). With a conversion-set, it can be used as a stand-by unit.

### Technical Data

DHR 20	Hose length	2 x 66 ft./ 20 m
	Weight	75 lbs / 34 kg
DHR 30	Hose length	2 x 99 ft./ 30 m
	Weight	90 lbs / 41 kg

**All LUKAS Hydraulic hoses with safety ratio 4:1**
