

Protective helmet for structural fire fighting in accordance with NFPA 1971-2018 (MH45681). Also classified in accordance with NFPA 1951-2013.

HEROS-titan Pro

Structural fire fighting helmet

Meets NFPA 1971, 2018 edition

Protective helmet for structural fire fighting in accordance with NFPA 1971-2018 (MH45681). Also classified in accordance with NFPA 1951-2013.

■ Helmet Features

1 Size adjustment from outside
Adjustments can easily be made while wearing gloves. Covers headsizes 49 to 67 cm (6 1/8 to 8 1/4 US).

2 Helmet flash light (optional)
Revolutionary helmet flash light (optional), detachable for use as hand flash light explosion proof, LED operated by 3 batteries AAA (included).

3 Eye protector and face shield
Integrated tilt-up eye protection and face shield.

4 Chinstrap
Ergonomic, 3-point chinstrap for perfect fit and stability.

5 Neck protection/ear covers
Neck protector made of heat and flame resistant material.

6 Additional side and neck protection.

Integrated LED flash light

An option available on the HEROS-titan Pro helmet is the LED light. This light securely attaches to the front of the helmet, directing the light in the direction of wearers eyes. Brightness can be adjusted in 3 stages by pressing the main button (120 / 90 / 15 lumens).

HEROS-titan Pro

The safest helmet in the fire industry

Comfort and safety under extreme conditions

- New design provides for maximum safety and outstanding comfort
- Padded ratchet system for increased comfort
- Better balance for less neck and shoulder strain
- Integrates well with all SCBA facepieces

It's time to put safety and comfort ahead of tradition

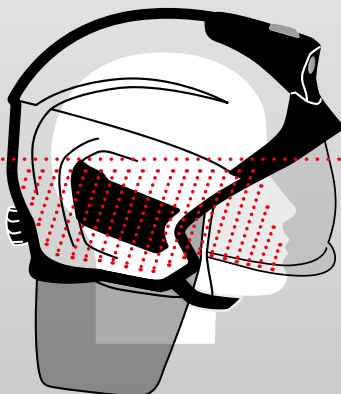

The extension of the helmet along the side of the wearers head provides additional protection in a critical area. This design reduces the severity of any side impact.

- Helmet profile provides increased side impact protection
- Reduces chances of entanglement in confined spaces

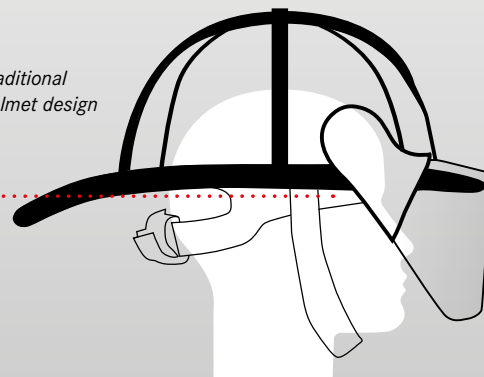

Additional side and neck protection
