

724WT

The 724WT is a Positive Pressure Ventilation (PPV), water powered fan that features a 24" cast aluminum airfoil blade and outputs over 22,000 cubic feet per minute.

The 724WT has solid cushion tires for easy transportation and a step brake that locks both wheels into position. The precision spun steel shroud is adjustable to four angle positions. A steel frame, full roll cage design and heavy gauge steel grill ensure safety and durability.

The WT Series fans are solely powered by water and are powerful units for extreme conditions. These units are perfect for districts that include docks, shipping facilities, and large commercial structures that may require the ventilation of hazardous atmospheres.

Specs

Power.....100-250psi of Water
Horsepower.....12
HxWxD.....27.75"x29"x21"
Fan Diameter.....24"
Weight.....88 lbs
CFM.....22,470
