

SVC3

Rescue operations demand fast and reliable cutting equipment. Super Vac's response is the SVC3 Power Pro Cutoff Saw, a high performance saw designed for the fire and rescue service. The SVC3's rugged, light-weight engine turns an industrial diamond blade that's voracious enough to cut through a variety of materials including residential roofing, concrete and rebar, and sheet metal- all without the use of water.

The SVC3 starts with a Dolmar PC 7414 and then is modified by Super Vac for the fire/rescue service.

Fire and rescue features include a multi-position cutting arm, a blade safety shield that adjusts without having to fumble with hard-to-grasp knobs, a D-ring pull handle, and a manual compression release for quick starts. A water tube dust suppression system is standard.

Specs

Engine	5.1 Hp Dolmar
CC's	73
HxWxD	12.5" x 13" x 33.5"
Blade Diameter.....	14"
Arbor	1"
Max Cutting Depth	4.8125"
Weight	21.8 lbs
