- Two Door or Four Door 6-Person Cab
- Engine - MaxxForce 9 — 330 HP
- Alternator - Leece Neville 270 Amp
- Transmission - Allison EVS3000

BODY FEATURES

- Up to 266 cubic feet of compartmentation.
- Large full depth compartments - 27" deep versus most at 25" to 26" deep.
- Compartment interiors fabricated from 3/16" aluminum plate.
- Aluminum extrusions are stronger than fabricated bodies.
- 3/16" door and body sides versus 1/8" if fabricated body design.
- Removable rear treadplate fenders and fiberglass liners.
- Heaviest rear body sub-structure in the industry.
- Spaced away polished extruded aluminum running boards and anodized aluminum rub rails providing true rub rail protection - less corrosion at seams.
- Corner casting at rear step for added strength and durability.
- Adjustable non-painted heavy-duty hosebed dividers.
