**ABOUT THE CHIMNEY SNUFFER**

The Chimney Snuffer quickly and safely suppresses chimney fires using an ultra-fine spray, greatly reducing potential water damage. The durable 5 pound (2.3 kg) nozzle head is simply operated by a single firefighter and easily breaks through potential blockages within the chimney. Eight strategically placed misting ports on the main nozzle body provide 40 gallons (150 liters) per hour at 60 psi (4 bar), allowing the Chimney Snuffer to be supplied by an attack line, 1" (25 mm) line, or even a garden hose. The entire package weighs less than 15 pounds (6.8 kg) and is easily stored in an apparatus compartment. The Chimney Snuffer Nozzle head and garden hose adapter can be purchased separately.
