ABOUT THE ULTIMATIC 125 SERIES

The ULTIMATICTM is available as either a handheld or electric remote monitor nozzle. It features flush without shutting down, molded rubber bumper with "power fog" teeth, and easily pairs with a number of low and multi-expansion foam attachments.

Handheld: An automatic nozzle available in 100 psi (7 bar) and 75 psi (5 bar) models in 1" (25mm) or 1.5" (38 mm) versions. It is adjustable from a straight stream to a dense fog pattern and includes detent flow control, "Gasket Grabber" inlet screen, patented TFT slide valve, and optional colored pistol grip and handle covers. ULTIMATIC's are also available with TFT's IMPULSETM trigger valve system.

Monitor Nozzle: A 1.5" (38mm) electric remote nozzle that's available in automatic or selectable flow styles. Flows range from 10-125gpm (40-500 l/min) in several pressure ratings. For use with the EF1 and Tornado monitor series.
