**ABOUT THE HURRICANE SERIES**

The HURRICANE is a durable, high capacity monitor capable of flowing up to 1250 gpm (4500 l/min) while maintaining a full 360° (manual) or 450° (RC) rotational ability. The red or silver powder coat finish (inside and out), and stainless steel elevation drive make the HURRICANE one appliance that can stand up to tough environments. It's available for industrial and apparatus applications in a manual or RC version with a wide range of controller, nozzle and EXTEND-A-GUN options.
