

# Turnout Gear Drying Lockers

Warner's specialized lockers save departments significant money by doubling the life of your turnout gear. In addition, they help firefighters by providing them some personal space and assuring that they never have to put on cold, damp gear.

For the best for your department, chose the *patent pending* turnout gear drying lockers from Warner.

# Turnout Gear Drying Lockers

patent pending

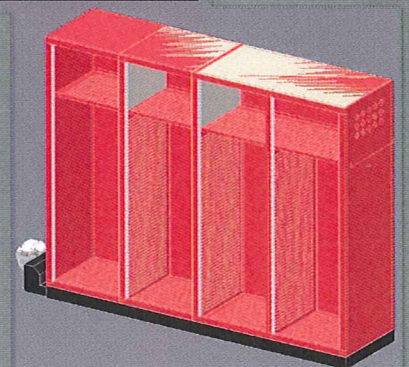

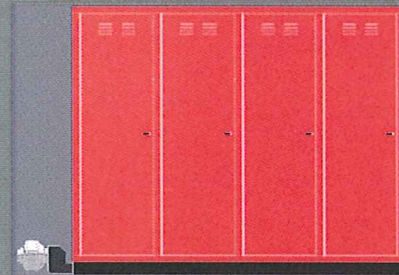

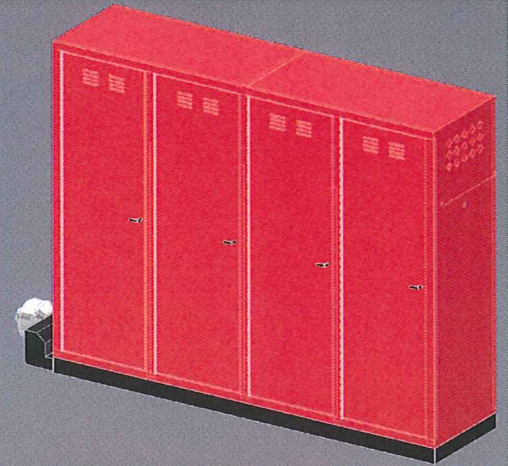

## Features and Benefits

- More than doubles the life of turnout gear
- Allows fire fighters to never put on cold, damp gear
- Dries turnout gear after washing in a fraction of time
- Protection from damaging UV rays caused by sunlight and fluorescent bulbs
- Allows each firefighter some personal space in the fire house
- Heavy-duty corrosion resistant finish

## Product Overview

UV lighting is the number one enemy to turnout gear. Gear manufacturers recommend replacing outfits every two to three years when stored in garages and four to five years for gear stored in rooms with fluorescent bulbs. Warner Bodies' lockers block out harmful UV rays and allow turnout gear to last ten years.

In 2009, NFPA 1871 significantly increased the washing and care requirements on turnout gear. These additional washing requirements make it more difficult to dry gear before it is needed again. Turnout Gear dryers are extremely expensive and also can damage gear due to the turning and flipping. With Warner's new Turnout Gear Drying Lockers, simply hang your gear, flip a switch and know your crew's turnout gear will be protected.
