

EUROCHARGER I VHO

VERY HIGH OUTPUT AUTOMATIC BATTERY CHARGER FOR SINGLE BATTERY SYSTEM

FOR THE SPECIFIC NEEDS OF EMERGENCY VEHICLES

SUPPORTS PARASITIC LOADS

LOW FREQUENCY – LOW NOISE

RUGGED CONSTRUCTION FOR VEHICLE MOUNTING

INPUT VOLTAGE SELECTABLE, 115 OR 230 VOLTS

DESIGNED TO CE REQUIREMENTS

MODEL 091-162T

**VERY HIGH
OUTPUT**

The Euro Charger I VHO is a fully automatic battery charger with a very high output, which is designed to meet CE requirements. Ruggedly constructed with a single output, it float charges the battery and may be installed on the vehicle.

Extremely precise voltage control maintains the charger output constant with variations in load or line voltage input. Active current limiting limits the output current so as not to exceed its rated value when charging deeply discharged batteries or if the vehicle is started while charging.

Two unique remote displays are available as options for this charger. One provides a simple, two LED display. A green LED indicates that power is ON while a red LED indicates that output current is flowing from the charger. A second display, a single bar graph, provides a graphic display of the charger output voltage.

MODEL #	091-162T-12	091-162T-24
VOLTAGE IN	115V OR 230V AC 50/60HZ	
CURRENT IN	10A/5A	
VOLTAGE OUT	12V	24V
CURRENT OUT	60A	30A
INDICATOR	SEE BELOW	
WEIGHT	14.5KG	
OUTLINE	034	

OPTIONAL REMOTE DISPLAYS

SINGLE BAR GRAPH DISPLAY LED INDICATOR
