

S-995

Smoke training used to be a nightmare for teachers using glycol based smokers that frequently clogged, produced rapidly dissipating smoke that burned when inhaled, and left slippery residue on surfaces.

That all changed with the introduction of Super Vac 's new self cleaning, mineral oil based, Cloud 9 Smoker, which produces huge amounts of pure white smoke, doesn't cause breathing discomfort, has superior hang time, and leaves no slippery residue.

The S-995 model produces twice the smoke in the same amount of time as the standard S-975 model by adding an extra outlet.

The Cloud 9 Smoker features the Automatic Clean Cycle, (ACC) that kicks in every time the machine is used. Change your next training nightmare into a dream, with the Cloud 9 Smoker machine from Super Vac.

requires 230V AC
