

Advanced's Fire System With Integrated Fire Telephone And Voice Evacuation System Installed At Siraj Tower In Dubai

Published on 16 May 2019

A fire system with integrated fire telephone and voice evacuation system from Advanced has been installed at an exclusive 30-storey residential high-rise in Dubai. Boasting state-of-the-art amenities, luxury interiors, a fully equipped gym and rooftop swimming pool, the Siraj Tower has become one of the most sought-after residential projects in the ambitious \$64billion entertainment complex, Dubailand.

As Advanced's exclusive distributor in Dubai, Cignetix were responsible for integrating this

crucial part of the building's active fire protection. Four Advanced Axis EN panels, which were recently certified by FM Approvals to the EN54 standard, and 2000 devices have been installed alongside its high-performance fire telephone solution.

Designed for clear, easy-to-use control, the system benefits from LED status indications showing its operational state

Sunil Gopalkrishnan, Managing Director at Cignetix, said: *"Thanks to their reputation for performance, quality and ease-of-use, Advanced are our preferred choice of fire alarm, fire telephone and voice evacuation systems – capable of handling large networks of up to 200 panels and complex cause and effect programming."*

Fire Telephone Solution

Advanced's fire telephone solution is ideal for high and low-rise apartment buildings, hotels, universities, government and military sites where local fire departments and emergency personnel need access to fire/emergency communications.

Designed for clear, easy-to-use control, the conventional system benefits from LED status indications showing its operational state – whether the system has a call-in, is connected or is in fault condition. The fire telephone system is compliant with EN54 parts 2 and 4 and can be configured as either a standalone, independent system or completely integrated into the Axis EN fire system.

Steve Carroll, Advanced's General Manager for the Middle East, said: *"The Siraj Tower is another fantastic example of the successful partnership between Cignetix and Advanced. In order to take full advantage of what our products offer, it takes companies like Cignetix, who have the skills and experience required, to apply Advanced to sites such as this prestigious high-rise"*

Axis EN Fire Panel Range

“ Axis EN, which is part of Advanced's Axis range of systems, holds global approvals, including EN54, UL864 and AS1670

Available for European, Middle East and South East Asian markets, Axis EN is Advanced's highest performance analogue panel range, combining 1-8 loop, fire panels configurable up to 200 panel networks with a complete range of wired and wireless loop devices and powerful peripherals. Axis EN, which is part of Advanced's Axis range of systems, holds global approvals, including EN54, UL864 and AS1670. It is designed to go anywhere where high quality, reliable and easy to use fire detection and control is required.

Advanced, owned by FTSE 100 company Halma PLC, have a long history of protecting some of the most prestigious high-rise residential developments in the world, including the Gold Coast's Soul Building and Miami's Sands Pointe.

Advanced is a pioneer in the development and manufacture of intelligent fire systems. The legendary performance, quality and ease of use of its products sees Advanced specified in locations all over the world, from single panel installations to large, multi-site networks. Advanced's products include complete fire detection systems, multi-protocol fire panels, extinguishing control, fire paging and false alarm management systems.
