

E2S Warning Signals to exhibit explosion proof sounders and beacons at AICHEMA 2015

Published on 10 June 2015

E2S Central Europe Sales Manager Joachim Ebert will be heading up the company's presence at the event

Joachim Ebert, Central Europe Sales Manager for **E2S Warning Signals**, the world's leading independent manufacturer of audible and visual warning signals, will be heading up the company's presence at AICHEMA on Stand G86 in Hall 11.1. The booth will feature existing, updated and new E2S products that are widely specified in chemical industry and process control applications.

Products for chemical industry and process control applications

The major displays include the BEx family of explosion proof sounders and beacons, including the innovative radial horn sounders that give a uniform 360° sound distribution; the H100 family of trumpet signal horns and combined units with LED beacons and the AlertAlight range of CPR compliant sounders, beacons and combination units ideally suited for process control and industrial signalling. Also featured are the recently updated E2x series of high performance non-sparking alarm horn sounders, Xenon strobe beacons and combined

devices, now approved for Zone 2, 22 applications to the latest IECEx and ATEX standards in addition to its existing Class I & II Division 2 UL and cULs approvals.

"ACHEMA is the world's largest forum for chemical engineering and process industry and is a key event for us to showcase our products designed for the needs of the industry" said Joachim Ebert.

Also on display will be other products from the E2S Warning Signals portfolio of more than 350 product variants.
