

Guide Infrared Thermcore SIM with advanced video processing technology

Technical Specification

Make	Guide Infrared	
Company	Guide Infrared	
Model code	Thermcore SIM	
Display	Standard Resolution	

**Additional
info**

Guide Infrared Thermcore SIM provides a crisp and clear high quality thermal image through its 384×288 pixels UFPA detector, further enhanced by advanced SIE Video Processing Algorithms. Based on the simple concept of a standard bloc camera module, its light weight, small size and standardized interfaces allow for a swift and efficient integration in surveillance system. It is suitable for the most challenging applications in every security field.
